Atlas InnFone

The Optional InnFone Billing and Information System, is an enhancement to the already feature rich InnFone Lodging Telephone System. This fully integrated computer and specialized software turns your front desk into a comprehensive hospitality management system. Advanced features such as guest names, complete call accounting, credit limits, room audits and an array of available reports, make the InnFone a powerful management system.

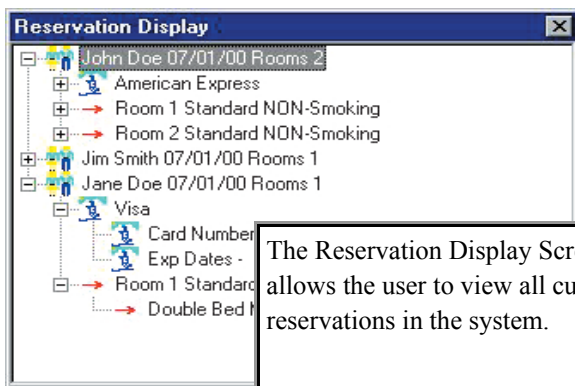

Why use InnFone System?

The Innfone System was specifically designed to help you fulfill your guests expectations of value.

Flexibility-The InnFone System can economically accommodate a small bed and breakfast of four rooms to properties up to 384 rooms.

Economical-The InnFone Systems out performs the competition in the area of price as it relates to functions, features and growth.

Reliability- Thousands of installations worldwide in both business and the lodging industry speak of quality and reliability.

The Reservation Display Screen allows the user to view all current reservations in the system.

Features:

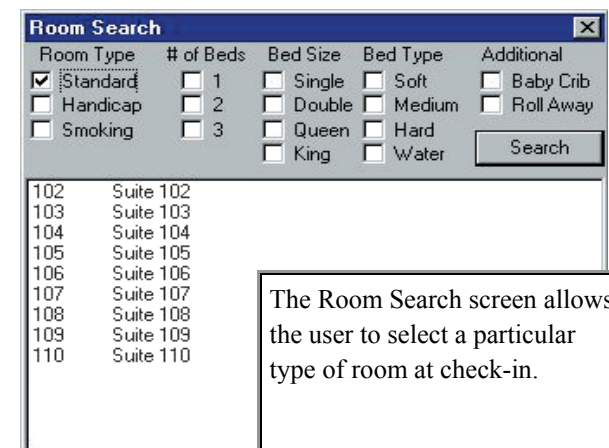

- ◆ **Check-In** -w/smart search allows you to find available room type before checking in (i.e. 2 double beds, 1 King bed). Enter details of guest, set credit limit, and activate room telephones.
- ◆ **Check-out**- print a complete report of telephone calls and charges. Room telephone is disabled upon check-out
- ◆ **911 Emergency Alert** -when a guest dials 911 in an emergency, the console and operator stations are notified of the event and which room was involved. The InnFone gives an audible message over the multimedia speakers.
- ◆ **Reservation system**- the InnFone has basic reservation system that allows the property manager to set reservations based upon dates and room types.
- ◆ **Room Types**- each room can be set up by number of beds, bed type, smoking/non smoking and additional features such as sofa bed, rollaway, bed etc.
- ◆ **Maid Tracking**-when the maid cleans an empty room, a code can be entered at the telephone in the room that the room is ready for occupancy.
- ◆ **Credit Limit**-a deposit can be made and credit limit set at check-in.
- ◆ **Toll Restriction**- the type of calls allowed by guest can be set at check-in.
- ◆ **User Login/Out**-the InnFone allows each user to have there own unique password. The user name is associated with all transactions they process for future reference.
- ◆ **Dual operator consoles**- make your front desk twice as efficient, saving money and time for you and your guest.
- ◆ **Terminal setup**-the InnFone can be setup to run on multiple terminals at a front desk. This allows several users to make changes at the same time on the same system.

System Features:

- ◆ **Automated Attendant** **
- ◆ **Auxiliary Attendant**
- ◆ **Call Accounting** **
- ◆ **Call Block**
- ◆ **Check-in/Check-Out Key**
- ◆ **Credit Limits** **
- ◆ **Dual Operator Consoles**
