## Wireless Internet (Wi-Fi)

Hot Spot consists of Wireless Internet access throughout the indoor business facility.

- Service is provisioned by installing one or two access points within the customer's location.
- Customer can mesh into an existing Municipal network, or can access Wireless using BHSI as transport method.
- Customer is charged a fixed monthly recurring charge for Wireless Internet access.
- Customer is provided with quantity of wireless users.
- Customer determines quantity needed (may require ICB)

### Basic Hotspot with Casual usage

Allows the business to have 5 wireless accounts that require a username and password to access the network (using the frontier.net domain).

Basic Hot Spot service includes the following:

- Access for 5 authenticated users
- BHSI loop
- Colubris 3200
- /30 subnet required for equipment provisioning
- Siemens SE567 modem

Term	MRC	subscriber codes
3 year	\$60	5

### Sponsored (Capital) Hotspot

Provides the business with a method by which to provide complimentary wireless access to their patrons. Patrons of the business access the Internet through a dedicated (Customer specific) splash page.

Sponsored Hot Spot service includes the following:

- Access for 10 concurrent users
- BHSI loop
- Colubris 3200
- /30 subnet required for equipment provisioning
- Siemens SE567 modem
- Customer specific splash page

Term	MRC	Open Network-10
3 year	\$110
