VIKING

Security and Communication Solutions

Applications

- Signal the beginning and end of class and lunch periods for schools
- Signal the beginning and end of shifts, breaks, and lunch periods for factories and other businesses
- Provides a door bell and/or alarm sound over an existing paging system for door entry, fire, severe weather applications
- Use with Viking's digital announces, to provide timed messages
- Better organization based on time and accuracy measurements

SPECIFICATIONS:

- 120V AC/13.8V AC 1.25A power adapter
- 133mmx91mmx44mm (5.25"x3.6"x1.75")
- Weighs about 2 pounds
- Battery backup, 9V
- 600 ohm audio output with volume adjust
- 128 event timer per 24 hours
- Battery charging circuit for 9V NiCad/NiMh battery

FEATURES:

- Programmable day of week on/off, selectable single, double, or triple alert sound
- Accurate digital 24 hour time clock, hours and minutes
- Connects a 10 position cage clamp terminal strip
- Accurate 24 hour digital time clock displays hours and minutes.
- User programmable 24 hour, 128 event timer.
- Programmable day of week on/off feature Selectable single, double, or triple alert sound.
- Three contact closure controlled sounds:
 - Emergency (yelp) siren
 - Temporal (slow whoop) evacuation signal (NFPA/ANSI compliant when used with supporting equipment),
 - Door bell (ding dong) sound.
- Volume controllable, 600 ohm, line level audio output.
- Non-volatile programming memory.
- Battery backup for maintaining clock time.
- Battery charging circuit for charging 9V. Ni-Cad/NiMh batteries.
- DPDT relay contacts for muting paging and background music during event tones.
